

DID YOU KNOW?

When a Child Performs On Stage...

W

hen a child participates in the performing arts it boosts their self-esteem and encourages creativity. Performing on stage gives students an opportunity to showcase their work in public and in front of their peers and family. On-stage performances teach a range of skills that go beyond the performance itself and can be applied to other areas of learning and life beyond school.

1

ADAPTABILITY Students learn how to improvise, solve problems on the spot, and handle unexpected situations.

2

PRIDE Students learn how to celebrate their wins and successes and those of their fellow performers.

3

COMMUNICATION Students develop presentation, communication, and listening skills.

4

CONFIDENCE Being on stage helps to build students confidence and develop a healthy self-esteem.

5

TIME MANAGEMENT Students learn the importance of timeliness and deadlines.

6

CREATIVE THINKING Students learn how to interpret and adapt a creative piece of work to make it showcase their abilities.

7

PERSEVERANCE Students develop perseverance by working on a task until it is perfected to the best of their ability.

8

COLLABORATION Students learn how to collaborate with and work alongside their peers.
